FRANCES A. CRANE WILDLIFE MANAGEMENT AREA

(Falmouth)

- GENERAL:** 1,824 acres total. This management area consists of two parcels: a 1,511-acre "Pheasant Area" and a 313-acre "Quail Area." Although there are some valleys and ridges created by glacial activity, most of area is relatively flat.
U.S.G. S. Quad: Pocasset
- VEGETATION:** Oak and pitch pine woodlands are interspersed with many small fields. There is one large, semi-open area which was formerly a grass-strip airfield.
- WATER:** A single two-acre pond is the only standing water on the area.
- WILDLIFE:** Deer, rabbit, squirrel, fox, coyote, quail, grouse, woodcock and numerous nongame species. The Pheasant Area is stocked with pheasant; the Quail Area is stocked with quail.
- SPECIAL REGULATIONS:** Note that a "hunter orange" hat is required wear for hunters during the pheasant/quail season.
